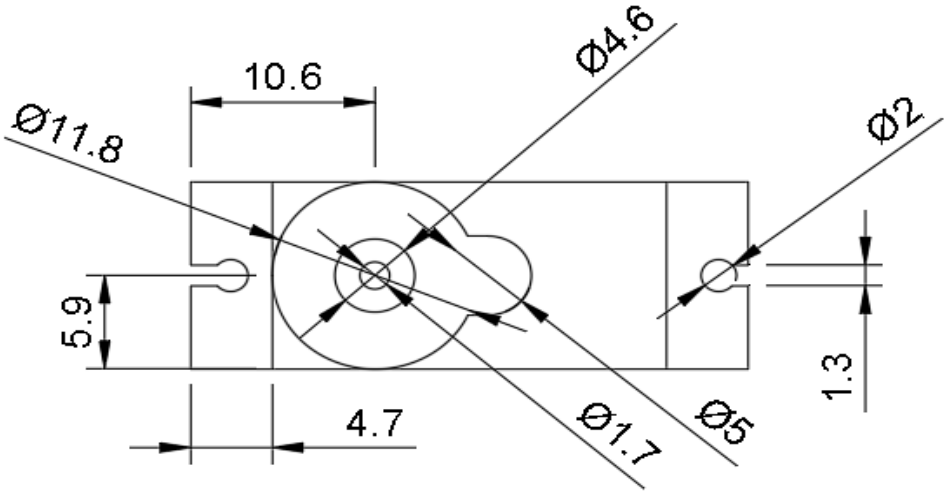
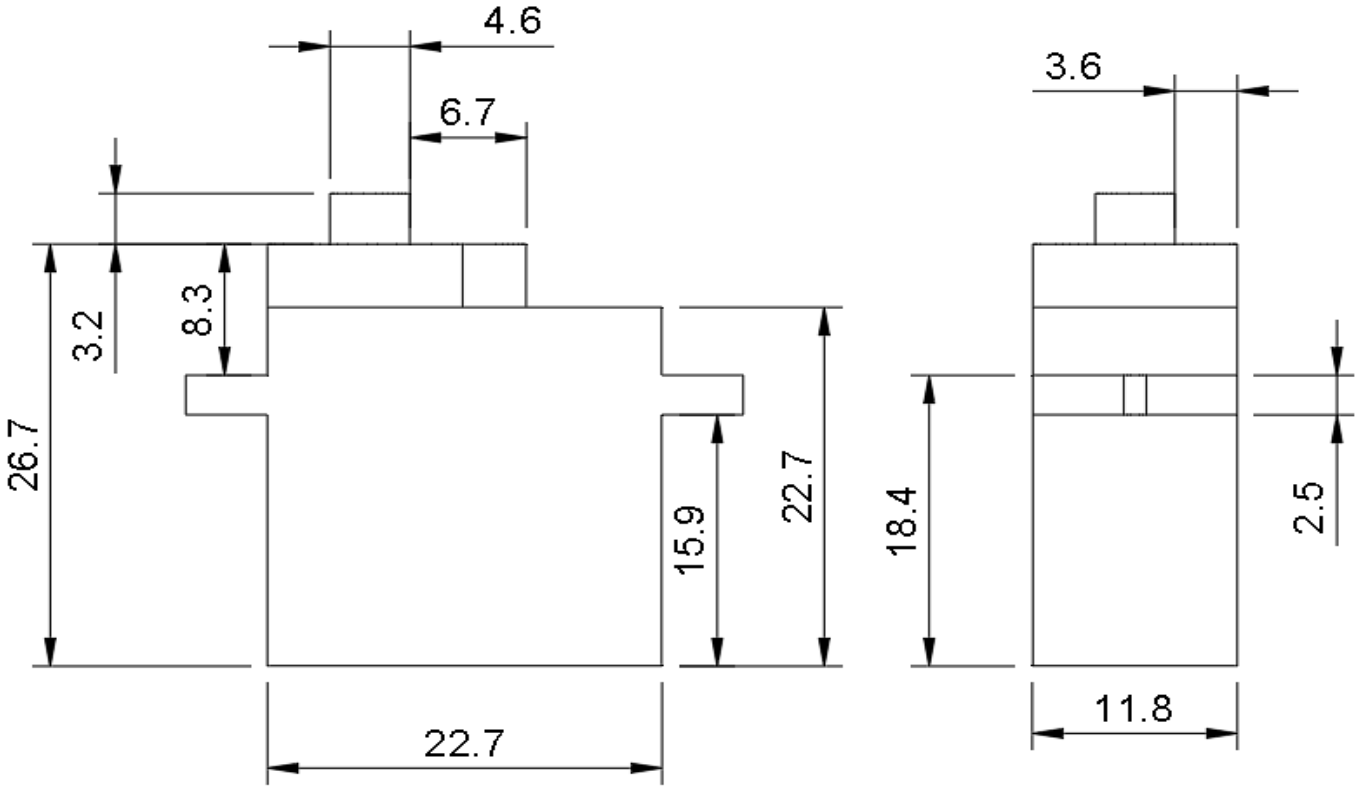
2565 Mini 180 Degree Servo

www.kitronik.co.uk

Dimension Datasheet




This Mini Servo is a great value multi-purpose micro size servo and it's ideal for use with micro-controller systems like the BBC micro:bit, Arduino, Raspberry Pi and PICAXE. It is very similar in design, weight and operation to the Tower Pro SG90 Mini Servo and can be used as a direct lower cost alternative. All measurements are shown in millimetres.
