USB4 Pro Dual Dock

ES623015

Product Introduction

40 Gbps data speed, 8K30 Hz video, Gigabit network, PD 100W charging, audio output and plenty of USB ports. The docks features a compact and eye-catching design with 98% aluminium housing with integrated heat dissipation function.

Structure overview

The eSTUFF USB4 Dual dock features the latest VL830 high speed docking technology that turns your laptop into a powerhouse workstation combining PD power up to 100W and productivity in a compact size.

It has no less than 7 USB ports for workstation essentials like a mouse and keyboard including four 10 Gbps connections for external SSD's.

You can connect up to 2 external monitors to the dock as long as your laptop will support 2 monitors with resolutions up to 8K30Hz.

Please note that the first generation of Apple M1 based laptops only support 1 external display.

USB4 is a significant improvement to the USB architecture, allowing for the coexistence of several data and display protocols on a single high-speed link with a aggregate bandwidth of up to 40Gbps.

The VL830 chipset from Via Labs supports both USB and DisplayPort and is fully compatible with Thunderbolt 4 and USB4 systems. It is also backward compatible with previous generation devices such as laptops, tablets, and smartphones that enable DisplayPort Alternate Mode over USB-C.

Specifications

USB-C Host connection	1 x USB3.2 Gen 3 (40Gbps)
USB-A ports	3 x USB3.2 (10 Gbps) with BC 1.2 (7.5W) charging 3 x USB2.0 (480Mbps)
USB-C ports	1 x USB3.2 (10 Gbps) 1 x PD3.0 100W charging
HDMI	1 x HDMI 2.1 8K30Hz with MST support
DisplayPort	1 x DisplayPort 1.4 8K30Hz with MST support
Network	1 x RJ45 Gigabit
Audio	1 x 3.5mm Minijack combo
Cardreader	1 x SD3.0 compatible with SDXC, SDHC, SD, MMC 1 x MicroSD compatible with MicroSDXC, MicroSDHC, UHS-I
